

option care health®

# Introducing environmentally conscious packaging

Option Care Health is committed to reducing our impact on the environment by updating our product packaging and compounded sterile preparations (CSPs) to more sustainable solutions. These new recyclable pack out materials are just one of the improvements we are making to enhance our services while providing extraordinary care to our patients and their families.

- **Reduce waste** and environmental impact
- **“Green” products** that are recyclable
- **Minimize frustration with styrofoam disposal** available through local municipalities
- All pack outs have been **tested with the International Safe Transit Association (ISTA)** 7E and 7D standards to ensure all products are kept at an optimal temperature throughout transit

## Starch Panel Solution

- Recycle
- Landfill
- Compost

## Thermal Bag Solution

- The CoolPAC® Max is recognized by the How2Recycle® Label Program and can be recycled at over **30,000** store drop-off locations.
- Just toss them in with your plastic grocery bags!
- Visit [bagandfilmrecycling.org](http://bagandfilmrecycling.org) to find your nearest location.
